About downloads

CSV downloads from this guide encoded as standard UTF-8 (Unicode). This is done to ensure correct encoding of all difference languages.

We recommend using a spreadsheet that support this, for instance **LibreOffice Calc**

If you wish to import the CSV correctly in Microsoft Excel, please do the following

1) Open Excel sheet

2) Under the tab **Data**, choose **From Text**

3) Select downloaded file

4) Select character encoding UTF-8 in appropriate select list.
