Goal	Target	Instrument	Article / Description
1 NO POVERTY  Find poverty in all its forms everywhere.	1.4  By 2030, ensure that all men and women, in particular the poor and the vulnerable, have equal rights to economic resources, as well as access to basic services, ownership and control over land and other forms of property, inheritance, natural resources, appropriate new technology and financial services, including microfinance.  Indicators 1.4.1  Proportion of population living in households with access to basic services 1.4.2  Proportion of total adult population with secure tenure rights to land, (a) with legally recognized documentation, and (b) who perceive their rights to land as secure, by sex and type of tenure	CBD Convention on Biological Diversity	Show all articles 8 Each Contracting Party shall, as far as possible and as appropriate:  8.j Subject to its national legislation, respect, preserve and maintain knowledge, innovations and practices of indigenous and local communities embodying traditional lifestyles relevant for the conservation and sustainable use of biological diversity and promote their wider application with the approval and involvement of the holders of such knowledge, innovations and practices and encourage the equitable sharing of the benefits arising from the utilization of such knowledge, innovations and practices;  10 Each Contracting Party shall, as far as possible and as appropriate:  10.c Protect and encourage customary use of biological resources in accordance with traditional cultural practices that are compatible with conservation or sustainable use requirements;  10.d Support local populations to develop and implement remedial action in degraded areas where biological diversity has been reduced;
2 ZERO HUNGER  SIGNATURE AND	2.3  By 2030, double the agricultural productivity and incomes of small-scale food producers, in particular women, indigenous peoples, family farmers, pastoralists and fishers, including through secure and equal access to land, other productive resources and inputs, knowledge, financial services, markets and opportunities for value addition and non-farm employment.  Indicators 2.3.1  Volume of production per labour unit by classes of farming/pastoral/ forestry enterprise size 2.3.2  Average income of small-scale food producers, by sex and indigenous status	CBD Convention on Biological Diversity	Show all articles 8

		13
		The Contracting Parties shall:  13.a  Promote and encourage understanding of the importance of, and the measures required for, the conservation of biological diversity, as well as its propagation through media, and the inclusion of these topics in educational programmes;
		13.b Cooperate, as appropriate, with other States and international organizations in developing educational and public awareness programmes, with respect to conservation and sustainable use of biological diversity.
		20.1 Each Contracting Party undertakes to provide, in accordance with its capabilities, financial support and incentives in respect of those national activities which intended to achieve the objectives of this Convention, in accordance with its national plans, priorities and programmes.
<b>2.4</b> By 2030, ensure sustainable food production	CBD Convention on Biological Diversity	Show all articles 6 Each Contracting Party shall, in accordance with its particular conditions and capabilities:
systems and implement resilient agricultural practices that increase productivity and production, that help maintain ecosystems, that strengthen capacity for adaptation to climate		6.a Develop national strategies, plans or programmes for the conservation and sustainable use of biological diversity or adapt for this purpose existing strategies, plans or programmes which shall reflect, inter alia, the measures set out in this Convention relevant to the Contracting Party concerned;
change, extreme weather, drought, flooding and other disasters and that progressively improve land and soil quality.  Indicators		6.b Integrate, as far as possible and as appropriate, the conservation and sustainable use of biological diversity into relevant sectoral or cross-sectoral plans, programmes and policies.
2.4.1 Proportion of agricultural area under productive and sustainable agricultural practices		
2.5  By 2020, maintain the genetic diversity of seeds, cultivated plants and farmed and domesticated		Show all articles 6 Each Contracting Party shall, in accordance with its particular conditions and capabilities:
animals and their related wild species, including through soundly managed and diversified seed and plant banks at the national, regional and international levels, and promote access to and		6.a Develop national strategies, plans or programmes for the conservation and sustainable use of biological diversity or adapt for this purpose existing strategies plans or programmes which shall reflect, inter alia, the measures set out in this Convention relevant to the Contracting Party concerned;
international levels, and promote access to and fair and equitable sharing of benefits arising from the utilization of genetic resources and associated traditional knowledge, as internationally agreed.		6.b Integrate, as far as possible and as appropriate, the conservation and sustainable use of biological diversity into relevant sectoral or cross-sectoral plans, programmes and policies.
Indicators 2.5.1		7 Each Contracting Party shall, as far as possible and as appropriate, in particular for the purposes of Articles 8 to 10:
Number of plant and animal genetic resources for food and agriculture secured in either medium or long-term conservation facilities 2.5.2		7.a Identify components of biological diversity important for its conservation and sustainable use having regard to the indicative list of categories set down in Ann
Proportion of local breeds classified as being at risk of extinction		7.b Monitor, through sampling and other techniques, the components of biological diversity identified pursuant to subparagraph (a) above, paying particular attent to those requiring urgent conservation measures and those which offer the greatest potential for sustainable use;
		7.c Identify processes and categories of activities which have or are likely to have significant adverse impacts on the conservation and sustainable use of biologic diversity, and monitor their effects through sampling and other techniques;
		7.d Maintain and organize, by any mechanism data, derived from identification and monitoring activities pursuant to subparagraphs (a), (b) and (c) above.
		8 Each Contracting Party shall, as far as possible and as appropriate:
		8.a Establish a system of protected areas or areas where special measures need to be taken to conserve biological diversity;
		8.c Regulate or manage biological resources important for the conservation of biological diversity whether within or outside protected areas, with a view to ensurit their conservation and sustainable use;
		8.f Rehabilitate and restore degraded ecosystems and promote the recovery of threatened species, inter alia, through the development and implementation of pl or other management strategies;

Endeavour to provide the conditions needed for compatibility between present uses and the conservation of biological diversity and the sustainable use of its components;

# 8.i

Subject to its national legislation, respect, preserve and maintain knowledge, innovations and practices of indigenous and local communities embodying traditional lifestyles relevant for the conservation and sustainable use of biological diversity and promote their wider application with the approval and involvement of the holders of such knowledge, innovations and practices and encourage the equitable sharing of the benefits arising from the utilization of such knowledge, innovations and practices;

# 8.1

Where a significant adverse effect on biological diversity has been determined pursuant to Article 7, regulate or manage the relevant processes and categories of activities

# 9

Each Contracting Party shall, as far as possible and as appropriate, and predominantly for the purpose of complementing in-situ measures:

# 9.a

Adopt measures for the ex-si tu conservation of components of biological diversity, preferably in the country of origin of such components

# a h

Establish and maintain facilities for ex-situ conservation of and research on plants, animals and micro-organisms, preferably in the country of origin of genetic resources:

# 9.c

Adopt measures for the recovery and rehabilitation of threatened species and for their reintroduction into their natural habitats under appropriate conditions;

# 9.d

Regulate and manage collection of biological resources from natural habitats for ex-situ conservation purposes so as not to threaten ecosystems and in-situ populations of species, except where special temporary ex-si tu measures are required under subparagraph (c) above;

# 9.e

Cooperate in providing financial and other support for ex-situ conservation outlined in subparagraphs (a) to (d) above and in the establishment and maintenance of ex-situ conservation facilities in developing countries.

# 10

Each Contracting Party shall, as far as possible and as appropriate:

# 10.b

Adopt measures relating to the use of biological resources to avoid or minimize adverse impacts on biological diversity;

# 10.c

Protect and encourage customary use of biological resources in accordance with traditional cultural practices that are compatible with conservation or sustainable use requirements;

# 15.1

Recognizing the sovereign rights of States over their natural resources, the authority to determine access to genetic resources rests with the national governments and is subject to national legislation.

# 15.2

Each Contracting Party shall endeavour to create renditions to facilitate access to genetic resources for environmentally sound uses by other Contracting Parties and not to impose restrictions that run counter to the objectives of this Convention.

# 15.3

For the purpose of this Convention, the genetic resources being provided by a Contracting Party, as referred to in this Article and Articles 16 and 19, are only those that are provided by Contracting Parties that are countries of origin of such resources or by the Parties that have acquired the genetic resources in accordance with this Convention.

# 15.4

Access, where granted, shall be on mutually agreed terms and subject to the provisions of this Article.

# 15.6

Each Contracting Party shall endeavour to develop and carry out scientific research based on genetic resources provided by other Contracting Parties with the full participation of, and where possible in such Contracting Parties.

# 15.

Each Contracting Party shall take legislative, administrative or policy measures, as appropriate, and in accordance with Articles 16 and 19 and, where necessary, through the financial mechanism established by Articles 20 and 21 with the aim of sharing in a fair and equitable way the results of research and development and the benefits arising from the commercial and other utilization of genetic resources with the Contracting Party providing such resources. Such sharing shall be upon mutually agreed terms.

Indicators 2.a.1 components: The agriculture orientation index for government expenditures 2.a.2 Total official flows (official development activities assistance plus other official flows) to the 8.m agriculture sector 12 h Technological Advice; 16.1 Each Contracting Party, recognizing that technology includes biotechnology, and that both access to and transfer of technology among Contracting Parties are essential elements for the attainment of the objectives of this Convention, undertakes subject to the provisions of this Article to provide and/or facilitate access for and transfer to other Contracting Parties of technologies that are relevant to the conservation and sustainable use of biological diversity or make use of genetic paragraphs 3, 4 and 5 below. 16.3 development and transfer of technology referred to in paragraph 1 above for the benefit of both governmental institutions and the private sector of developing countries and in this regard shall abide by the obligations included in paragraphs 1. 2 and 3 above. 2.b Show all articles

# Correct and prevent trade restrictions and distortions in world agricultural markets, including through the parallel elimination of all forms of agricultural export subsidies and all export measures with equivalent effect, in accordance with the mandate of the Doha Development Round. Indicators Agricultural export subsidies

<b>CBD</b> Convention on Biological Diversity

# Each Contracting Party shall, as far as possible and as appropriate, cooperate with other Contracting Parties, directly or. where appropriate, through competent international organizations, in respect of areas beyond national jurisdiction and on other matters of mutual interest, for the conservation and sustainable use of Each Contracting Party shall, as far as possible and as appropriate: Endeavour to provide the conditions needed for compatibility between present uses and the conservation of biological diversity and the sustainable use of its Where a significant adverse effect on biological diversity has been determined pursuant to Article 7, regulate or manage the relevant processes and categories of Cooperate in providing financial and other support for in-situ conservation outlined in subparagraphs (a) to (1) above, particularly to developing countries The Contracting Parties, taking into account the special needs of developing countries, shall: Promote and encourage research which contributes to the conservation and sustainable use of biological diversity, particularly in developing countries, inter alia, in accordance with decisions of the Conference of the Parties taken in consequence of recommendations of the Subsidiary Body on Scientific. Technical and In keeping with the provisions of Articles 16. 13 and 20. promote and cooperate in the use of scientific advances in biological diversity research in developing methods for conservation and sustainable use of biological resources:

resources and do not cause significant damage to the environment. Access to and transfer of technology referred to in paragraph 1 above to developing countries shall be provided and/or facilitated under fair and most favourable terms, including on concessional and referential terms where mutually agreed, and, where necessary, in accordance with the financial mechanism established by Articles 20 and 21. In the case of technology subject to patents and other intellectual property rights, such access and transfer shall be provided on terms which recognize and are consistent with the adequate and effective protection of intellectual property rights. The application of this paragraph shall be consistent with Each Contracting Party shall take legislative, administrative or policy measures, as appropriate, with the aim that Contracting Parties, in particular those that are developing countries, which provide genetic resources are provided access to and transfer of technology which makes use of those resources, on mutually agreed terms, including technology protected by patents and other intellectual property rights, where necessary, through the provisions of Articles 20 and 21 and in accordance with international law and consistent with paragraphs 4 and 5 below. Each Contracting Party shall take legislative, administrative or policy measures, as appropriate, with the aim that the private sector facilitates access to, joint

Each Contracting Party shall, as far as possible and as appropriate, cooperate with other Contracting Parties, directly or, where appropriate, through competent international organizations, in respect of areas beyond national jurisdiction and on other matters of mutual interest, for the conservation and sustainable use of biological diversity. Each Contracting Party shall, as far as possible and as appropriate, adopt economically and socially sound measures that act as incentives for the conservation and sustainable use of components of biological diversity.

Each Contracting Party shall take all practicable measures to promote and advance priority access on a fair and equitable basis by Contracting Parties. especially developing countries, to the results and benefits arising from biotechnologies based upon genetic resources provided by those Contracting Parties. Such access shall be on mutually agreed terms.

4 QUALITY PUICATION	By 2030, ensure that all learners acquire the knowledge and skills needed to promote sustainable development, including, among others, through education for sustainable development and sustainable lifestyles, human rights, gender equality, promotion of a culture of peace and non-violence, global citizenship and appreciation of cultural diversity and of culture's contribution to sustainable development.  Indicators 4.7.1  Extent to which (i) global citizenship education and (ii) education for sustainable development, including gender equality and human rights, are mainstreamed at all levels in: (a) national education policies, (b) curricula, (c) teacher education and (id) student assessment	CBD Convention on Biological Diversity	13
Librarion			The Contracting Parties shall:  13.a  Promote and encourage understanding of the importance of, and the measures required for, the conservation of biological diversity, as well as its propagation through media, and the inclusion of these topics in educational programmes;
Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.			13.b Cooperate, as appropriate, with other States and international organizations in developing educational and public awareness programmes, with respect to conservation and sustainable use of biological diversity.
5 GENDER EQUALITY	5.a  Undertake reforms to give women equal rights to economic resources, as well as access to ownership and control over land and other forms of property, financial services, inheritance and natural resources, in accordance with national laws.	CBD Convention on Biological Diversity	Show all articles 8 Each Contracting Party shall, as far as possible and as appropriate:
₫"			8.j Subject to its national legislation, respect, preserve and maintain knowledge, innovations and practices of indigenous and local communities embodying traditional lifestyles relevant for the conservation and sustainable use of biological diversity and promote their wider application with the approval and involvement of the holders of such knowledge, innovations and practices and encourage the equitable sharing of the benefits arising from the utilization of such knowledge, innovations and practices;
Achieve gender equality and empower all women and girls.	Indicators 5.a.1 (a) Proportion of total agricultural population with ownership or secure rights over agricultural land,		10 Each Contracting Party shall, as far as possible and as appropriate:
·	ownership or secure nights over agricultural land, by sex; and b) share of women among owners or rights-bearers of agricultural land, by type of tenure 5.a.2  Proportion of countries where the legal framework (including customary law) guarantees women's equal rights to land ownership and/or control		10.c Protect and encourage customary use of biological resources in accordance with traditional cultural practices that are compatible with conservation or sustainable use requirements;
			10.d Support local populations to develop and implement remedial action in degraded areas where biological diversity has been reduced;
			11 Each Contracting Party shall, as far as possible and as appropriate, adopt economically and socially sound measures that act as incentives for the conservation and sustainable use of components of biological diversity.
C CLEAN WATER	By 2020, protect and restore water-related ecosystems, including mountains, forests, wetlands, rivers, aquifers and lakes.  Indicators 6.6.1  Change in the extent of water-related ecosystems over time	CBD Convention on Biological Diversity	Show all articles
O AND SANITATION			Each Contracting Party shall, in accordance with its particular conditions and capabilities:
À			6.a Develop national strategies, plans or programmes for the conservation and sustainable use of biological diversity or adapt for this purpose existing strategies, plans or programmes which shall reflect, inter alia, the measures set out in this Convention relevant to the Contracting Party concerned;
Ensure availability and sustainable			6.b Integrate, as far as possible and as appropriate, the conservation and sustainable use of biological diversity into relevant sectoral or cross-sectoral plans, programmes and policies.
management of water and sanitation for all.			7 Each Contracting Party shall, as far as possible and as appropriate, in particular for the purposes of Articles 8 to 10:
			7.a Identify components of biological diversity important for its conservation and sustainable use having regard to the indicative list of categories set down in Annex I;
			7.b Monitor, through sampling and other techniques, the components of biological diversity identified pursuant to subparagraph (a) above, paying particular attention to those requiring urgent conservation measures and those which offer the greatest potential for sustainable use;
			8 Each Contracting Party shall, as far as possible and as appropriate:
			8.a Establish a system of protected areas or areas where special measures need to be taken to conserve biological diversity;

# 8 h

Develop, where necessary, guidelines for the selection, establishment and management of protected areas or areas where special measures need to be taken to conserve biological diversity;

# 8 c

Regulate or manage biological resources important for the conservation of biological diversity whether within or outside protected areas, with a view to ensuring their conservation and sustainable use:

# 8.0

Promote the protection of ecosystems, natural habitats and the maintenance of viable populations of species in natural surroundings;

### 80

Promote environmentally sound and sustainable development in areas adjacent to protected areas with a view to furthering protection of these areas;

# 8.f

Rehabilitate and restore degraded ecosystems and promote the recovery of threatened species, inter alia, through the development and implementation of plans or other management strategies;

# 8.0

Establish or maintain means to regulate, manage or control the risks associated with the use and release of living modified organisms resulting from biotechnology which are likely to have adverse environmental impacts that could affect the conservation and sustainable use of biological diversity, taking also into account the risks to human health;

# 8 h

Prevent the introduction of, control or eradicate those alien species which threaten ecosystems, habitats or species;

# Ωi

Endeavour to provide the conditions needed for compatibility between present uses and the conservation of biological diversity and the sustainable use of its components:

# 8.j

Subject to its national legislation, respect, preserve and maintain knowledge, innovations and practices of indigenous and local communities embodying traditional lifestyles relevant for the conservation and sustainable use of biological diversity and promote their wider application with the approval and involvement of the holders of such knowledge, innovations and practices and encourage the equitable sharing of the benefits arising from the utilization of such knowledge, innovations and practices:

# 8.k

Develop or maintain necessary legislation and/or other regulatory provisions for the protection of threatened species and populations

# 8.1

Where a significant adverse effect on biological diversity has been determined pursuant to Article 7, regulate or manage the relevant processes and categories of activities

# 8.m

Cooperate in providing financial and other support for in-situ conservation outlined in subparagraphs (a) to (1) above, particularly to developing countries

# 9

Each Contracting Party shall, as far as possible and as appropriate, and predominantly for the purpose of complementing in-situ measures:

# 9.c

Adopt measures for the recovery and rehabilitation of threatened species and for their reintroduction into their natural habitats under appropriate conditions;

# 10

Each Contracting Party shall, as far as possible and as appropriate:

# 10.a Integ

Integrate consideration of the conservation and sustainable use of biological resources into national decision-making;

# 10.b

Adopt measures relating to the use of biological resources to avoid or minimize adverse impacts on biological diversity;

# 10.c

Protect and encourage customary use of biological resources in accordance with traditional cultural practices that are compatible with conservation or sustainable use requirements;

# 10.d

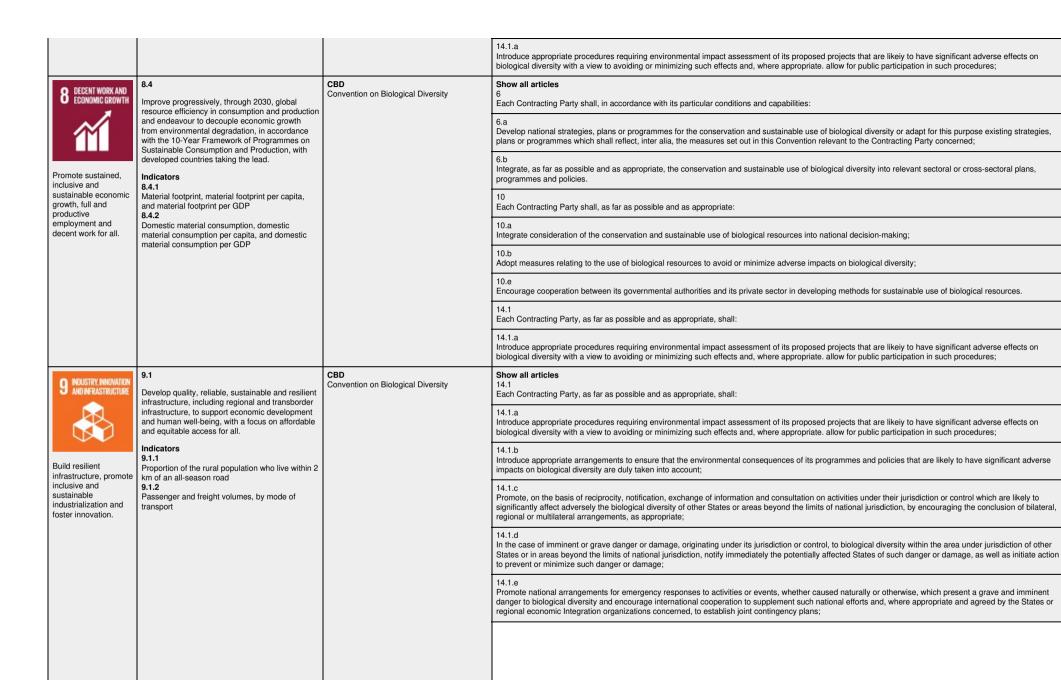

Support local populations to develop and implement remedial action in degraded areas where biological diversity has been reduced;

# 10.e

Encourage cooperation between its governmental authorities and its private sector in developing methods for sustainable use of biological resources.

# 14.1

Each Contracting Party, as far as possible and as appropriate, shall:

	Strengthen efforts to protect and safeguard the world's cultural and natural heritage.		Each Contracting Party shall, in accordance with its particular conditions and capabilities:
	Indicators 11.4.1 Total per capita expenditure on the preservation, protection and conservation of all cultural and natural heritage, by source of funding (public, private), type of heritage (cultural, natural) and level of government (national, regional, and local/municipal)		6.a  Develop national strategies, plans or programmes for the conservation and sustainable use of biological diversity or adapt for this purpose existing strategies, plans or programmes which shall reflect, inter alia, the measures set out in this Convention relevant to the Contracting Party concerned;
			6.b Integrate, as far as possible and as appropriate, the conservation and sustainable use of biological diversity into relevant sectoral or cross-sectoral plans, programmes and policies.
			7 Each Contracting Party shall, as far as possible and as appropriate, in particular for the purposes of Articles 8 to 10:
			7.a Identify components of biological diversity important for its conservation and sustainable use having regard to the indicative list of categories set down in Annex I;
			7.b Monitor, through sampling and other techniques, the components of biological diversity identified pursuant to subparagraph (a) above, paying particular attention to those requiring urgent conservation measures and those which offer the greatest potential for sustainable use;
			7.c Identify processes and categories of activities which have or are likely to have significant adverse impacts on the conservation and sustainable use of biological diversity, and monitor their effects through sampling and other techniques;

Maintain and organize, by any mechanism data, derived from identification and monitoring activities pursuant to subparagraphs (a), (b) and (c) above.

Each Contracting Party shall, as far as possible and as appropriate:

Establish a system of protected areas or areas where special measures need to be taken to conserve biological diversity;

Develop, where necessary, guidelines for the selection, establishment and management of protected areas or areas where special measures need to be taken to conserve biological diversity;

Regulate or manage biological resources important for the conservation of biological diversity whether within or outside protected areas, with a view to ensuring their conservation and sustainable use;

Promote the protection of ecosystems, natural habitats and the maintenance of viable populations of species in natural surroundings;

Promote environmentally sound and sustainable development in areas adjacent to protected areas with a view to furthering protection of these areas;

Rehabilitate and restore degraded ecosystems and promote the recovery of threatened species, inter alia, through the development and implementation of plans or other management strategies;

Establish or maintain means to regulate, manage or control the risks associated with the use and release of living modified organisms resulting from biotechnology which are likely to have adverse environmental impacts that could affect the conservation and sustainable use of biological diversity, taking also into account the risks to human health;

Prevent the introduction of, control or eradicate those alien species which threaten ecosystems, habitats or species;

Endeavour to provide the conditions needed for compatibility between present uses and the conservation of biological diversity and the sustainable use of its components;

Subject to its national legislation, respect, preserve and maintain knowledge, innovations and practices of indigenous and local communities embodying traditional lifestyles relevant for the conservation and sustainable use of biological diversity and promote their wider application with the approval and involvement of the holders of such knowledge, innovations and practices and encourage the equitable sharing of the benefits arising from the utilization of such knowledge, innovations and practices:

Develop or maintain necessary legislation and/or other regulatory provisions for the protection of threatened species and populations

Where a significant adverse effect on biological diversity has been determined pursuant to Article 7, regulate or manage the relevant processes and categories of activities

# 8.m

Cooperate in providing financial and other support for in-situ conservation outlined in subparagraphs (a) to (1) above, particularly to developing countries

Each Contracting Party shall, as far as possible and as appropriate, and predominantly for the purpose of complementing in-situ measures:

Adopt measures for the ex-si tu conservation of components of biological diversity, preferably in tne country of origin of such components

Establish and maintain facilities for ex-situ conservation of and research on plants, animals and micro-organisms, preferably in the country of origin of genetic resources;

# 9.c

Adopt measures for the recovery and rehabilitation of threatened species and for their reintroduction into their natural habitats under appropriate conditions;

# 9.d

Regulate and manage collection of biological resources from natural habitats for ex-situ conservation purposes so as not to threaten ecosystems and in-situ populations of species, except where special temporary ex-si tu measures are required under subparagraph (c) above;

Cooperate in providing financial and other support for ex-situ conservation outlined in subparagraphs (a) to (d) above and in the establishment and maintenance of ex-situ conservation facilities in developing countries.

10

Each Contracting Party shall, as far as possible and as appropriate:

10.a

Integrate consideration of the conservation and sustainable use of biological resources into national decision-making;

10.b

Adopt measures relating to the use of biological resources to avoid or minimize adverse impacts on biological diversity;

10.c

Protect and encourage customary use of biological resources in accordance with traditional cultural practices that are compatible with conservation or sustainable use requirements;

10.d

Support local populations to develop and implement remedial action in degraded areas where biological diversity has been reduced:

10.e

Encourage cooperation between its governmental authorities and its private sector in developing methods for sustainable use of biological resources.

11

Each Contracting Party shall, as far as possible and as appropriate, adopt economically and socially sound measures that act as incentives for the conservation and sustainable use of components of biological diversity.

12

The Contracting Parties, taking into account the special needs of developing countries, shall:

12.a

Establish and maintain programmes for scientific and technical education and training in measures for the identification, conservation and sustainable use of biological diversity and its components and provide support for such education and training for the specific needs of developing countries;

12.b

Promote and encourage research which contributes to the conservation and sustainable use of biological diversity, particularly in developing countries, inter alia, in accordance with decisions of the Conference of the Parties taken in consequence of recommendations of the Subsidiary Body on Scientific, Technical and Technological Advice:

12.c

In keeping with the provisions of Articles 16. 13 and 20. promote and cooperate in the use of scientific advances in biological diversity research in developing methods for conservation and sustainable use of biological resources;

13

The Contracting Parties shall:

13.a

Promote and encourage understanding of the importance of, and the measures required for, the conservation of biological diversity, as well as its propagation through media, and the inclusion of these topics in educational programmes;

13.b

Cooperate, as appropriate, with other States and international organizations in developing educational and public awareness programmes, with respect to conservation and sustainable use of biological diversity.

14.1

Each Contracting Party, as far as possible and as appropriate, shall:

14.1.a

Introduce appropriate procedures requiring environmental impact assessment of its proposed projects that are likely to have significant adverse effects on biological diversity with a view to avoiding or minimizing such effects and, where appropriate, allow for public participation in such procedures;

14.1.b

Introduce appropriate arrangements to ensure that the environmental consequences of its programmes and policies that are likely to have significant adverse impacts on biological diversity are duly taken into account;

14.1.c

Promote, on the basis of reciprocity, notification, exchange of information and consultation on activities under their jurisdiction or control which are likely to significantly affect adversely the biological diversity of other States or areas beyond the limits of national jurisdiction, by encouraging the conclusion of bilateral, regional or multilateral arrangements, as appropriate;

14.1.0

In the case of imminent or grave danger or damage, originating under its jurisdiction or control, to biological diversity within the area under jurisdiction of other States or in areas beyond the limits of national jurisdiction, notify immediately the potentially affected States of such danger or damage, as well as initiate action to prevent or minimize such danger or damage;

# 1410

Promote national arrangements for emergency responses to activities or events, whether caused naturally or otherwise, which present a grave and imminent danger to biological diversity and encourage international cooperation to supplement such national efforts and, where appropriate and agreed by the States or regional economic Integration organizations concerned, to establish joint contingency plans:

# 142

The Conference of the Parties shall examine, on the basis of studies to be carried out, the issue of liability and redress, including restoration and compensation, for damage to biological diversity, except where such liability is a purely internal matter.

# 18.

The Contracting Parties shall promote international technical and scientific cooperation in the field of conservation and sustainable use of biological diversity, where necessary, through the appropriate international and national institutions.

# 18 2

Each Contracting Party shall promote technical and scientific cooperation with other Contracting Parties, in particular developing countries, in implementing this Convention, inter alia, through the development and implementation of national policies. In promoting such cooperation, special attention should be given to the development and strengthening of national capabilities, by means of human resources development and institution building.

# 18.3

The Conference of the Parties, at its first meeting, shall determine how to establish a clearing-house mechanism to promote and facilitate technical and scientific cooperation.

# 18.4

The Contracting Parties shall, in accordance with national legislation and policies, encourage and develop methods of cooperation for the development and use of technologies, including indigenous and traditional technologies, in pursuance of the objectives of this Convention. For this purpose, the Contracting Parties shall also promote cooperation in the training of personnel and exchange of experts.

# 18.5

The Contracting Parties shall, subject to mutual agreement, promote the establishment of joint researcn programmes and joint ventures for the development of technologies relevant to the objectives of this Convention.

# 20.1

Each Contracting Party undertakes to provide, in accordance with its capabilities, financial support and incentives in respect of those national activities which are intended to achieve the objectives of this Convention, in accordance with its national plans, priorities and programmes.

# 20.2

The developed country Parties shall provide new and additional financial resources to enable developing country Parties to meet the agreed full incremental costs to them of implementing measures which fulfil the obligations of this Convention and to benefit from its provisions and which costs are agreed between a developing country Party and the institutional structure referred to in Article 21, in accordance with policy, strategy, programme priorities and eligibility criteria and an indicative list of incremental costs established by the Conference of the Parties. Other Parties, including countries undergoing the process of transition to a market economy, may voluntarily assume the obligations of the developed country Parties. For the purpose of this Article, the Conference of the Parties, shall at its first meeting establish a list of developed country Parties and other Parties which voluntarily assume the obligations of the developed country Parties. The Conference of the Parties shall periodically review and if necessary amend the list. Contributions from other countries and sources on a voluntary basis would also be encouraged. The implementation of these commitments shall take into account the need for adequacy, predictability and timely flow of funds and the importance of burden-sharing among the contributing Parties included in the list.

# 20.3

The developed country Parties may also provide, and developing country Parties avail themselves of, financial resources related to the implementation of this Convention through bilateral, regional and other multilateral channels.

# 20.4

The extent to which developing country Parties will effectively implement their commitments under this Convention will depend on the effective implementat ion by developed country Parties of their commitments under this Convention related to financial resources and transfer of technology and will take fully into account the fact that economic and social development and eradication of poverty are the first and overriding priorities of the developing country Parties.

# 20.5

The Parties shall take full account of the specific needs and special situation of least developed countries in their actions with regard to funding and transfer of technology.

# 20.6

The Contracting Parties shall also take into consideration the special conditions resulting from the dependence on, distribution and location of biological diversity within developing country Parties, in particular small island States.

# 20.

Consideration shall also be given to the special situation of developing countries, including those that are most environmentally vulnerable, such as those with arid and semi-arid zones, coastal and mountainous areas.

12 RESPONSIBLE CONSUMPTION AND PRODUCTION CONSUMPTION and production patterns.	11.a  Support positive economic, social and environmental links between urban, peri-urban and rural areas by strengthening national and regional development planning.  Indicators 11.a.1  Number of countries that have national urban policies or regional development plans that (a) respond to population dynamics; (b) ensure balanced territorial development; and (c) increase local fiscal space  12.1  Implement the 10-year framework of programmes on sustainable consumption and production, all countries taking action, with developed countries taking the lead, taking into account the development and capabilities of developing countries.  Indicators 12.1.1  Number of countries developing, adopting or implementing policy instruments aimed at supporting the shift to sustainable consumption and production	CBD Convention on Biological Diversity  CBD Convention on Biological Diversity	21.1 There shall be a mechanism for the provision of financial resources to developing country Parties for purposes of this Convention on a grant or concessional basis the essential elements of which are described in this Article. The mechanism shall function under the authority and guidance of, and be accountable to the Contenence of the Parties for purposes of this Convention. The operations of the mechanism shall be carried out by such institutional structure as may be contened to the Parties for purposes of this Convention. The operations of the mechanism shall be carried out by such institutional structure as may be contened to the Parties and the reliability criteria reliability and provided and provided provided by the Conference of the Parties and the importance of burden-sharing among the conflictioning Parties included in Its referred to in Article 20, paragraph 2. Voluntary contributions may also be made by the developed country Parties and by other countries and sources. The mechanism shall operate within a democracia and transparent system of governance.  21.2  21.2  21.2  21.2  21.2  21.2  21.2  21.2  21.3  The Conference of the Parties shall at its first meeting determine the policy, strategy and programme priorities, as well as detailed orieria and guidelines for eligibility for access to and utilization of the financial resources including monitoring and evaluation on a regular basis of such utilization. The Conference of the Parties shall decide on the arrangements to give effect to paragraph 1 above after consultation with the institutional structure entrusted with the operation of the financial mechanism.  21.4  The Confracting Parties shall consider strengthening existing financial institutions to provide financial resources for the conservation and sustainable use of biological diversity into relevant sectoral or cross-sectoral plans, programmes and policies.  6b. I
			Integrate, as far as possible and as appropriate, the conservation and sustainable use of biological diversity into relevant sectoral or cross-sectoral plans,
			10.a Integrate consideration of the conservation and sustainable use of biological resources into national decision-making;
			10.b Adopt measures relating to the use of biological resources to avoid or minimize adverse impacts on biological diversity;
			10.c Protect and encourage customary use of biological resources in accordance with traditional cultural practices that are compatible with conservation or sustainable use requirements;
			11 Each Contracting Party shall, as far as possible and as appropriate, adopt economically and socially sound measures that act as incentives for the conservation and sustainable use of components of biological diversity.

By 2030, achieve the sustainable management and efficient use of natural resources.  Indicators 12.2.1  Material footprint, material footprint per capita and material footprint per GDP 12.2.2  Domestic material consumption, domestic material consumption per capita, and domestic material consumption per GDP	CBD Convention on Biological Diversity	Show all articles 3 States have, in accordance with the Charter of the United Nations and the principles of international law, the sovereign right to exploit their own resources pursuant to their own environmental policies, and the responsibility to ensure that activities within their jurisdiction or control do not cause damage to the environment of other States or of areas beyond the limits of national jurisdiction.  6 Each Contracting Party shall, in accordance with its particular conditions and capabilities: 6.a Develop national strategies, plans or programmes for the conservation and sustainable use of biological diversity or adapt for this purpose existing strategies, plans or programmes which shall reflect, inter alia, the measures set out in this Convention relevant to the Contracting Party concerned; 6.b Integrate, as far as possible and as appropriate, the conservation and sustainable use of biological diversity into relevant sectoral or cross-sectoral plans, programmes and policies.  10 Each Contracting Party shall, as far as possible and as appropriate:  10.a Integrate consideration of the conservation and sustainable use of biological resources into national decision-making;  10.b Adopt measures relating to the use of biological resources to avoid or minimize adverse impacts on biological diversity;  10.c
		Protect and encourage customary use of biological resources in accordance with traditional cultural practices that are compatible with conservation or sustainable use requirements;  10.d Support local populations to develop and implement remedial action in degraded areas where biological diversity has been reduced;  10.e Encourage cooperation between its governmental authorities and its private sector in developing methods for sustainable use of biological resources.  14.1 Each Contracting Party, as far as possible and as appropriate, shall:  14.1.a Introduce appropriate procedures requiring environmental impact assessment of its proposed projects that are likely to have significant adverse effects on biological diversity with a view to avoiding or minimizing such effects and, where appropriate. allow for public participation in such procedures;  14.1.b Introduce appropriate arrangements to ensure that the environmental consequences of its programmes and policies that are likely to have significant adverse impacts on biological diversity are duly taken into account;
Encourage companies, especially large and transnational companies, to adopt sustainable practices and to integrate sustainability information into their reporting cycle.  Indicators 12.6.1  Number of companies publishing sustainability reports	CBD Convention on Biological Diversity	Show all articles 10 Each Contracting Party shall, as far as possible and as appropriate:  10.e Encourage cooperation between its governmental authorities and its private sector in developing methods for sustainable use of biological resources.  13 The Contracting Parties shall:  13.a Promote and encourage understanding of the importance of, and the measures required for, the conservation of biological diversity, as well as its propagation through media, and the inclusion of these topics in educational programmes;  13.b Cooperate, as appropriate, with other States and international organizations in developing educational and public awareness programmes, with respect to conservation and sustainable use of biological diversity.

# 12.8

By 2030, ensure that people everywhere have the relevant information and awareness for sustainable development and lifestyles in harmony with nature.

# Indicators

# 12.8.1

Extent to which (i) global citizenship education and (ii) education for sustainable development (including climate change education) are mainstreamed in (a) national education policies; (b) curricula; (c) teacher education; and (d) student assessment

12

The Contracting Parties, taking into account the special needs of developing countries, shall:

# 12.a

Establish and maintain programmes for scientific and technical education and training in measures for the identification, conservation and sustainable use of biological diversity and its components and provide support for such education and training for the specific needs of developing countries;

# 12.b

Promote and encourage research which contributes to the conservation and sustainable use of biological diversity, particularly in developing countries, inter alia, in accordance with decisions of the Conference of the Parties taken in consequence of recommendations of the Subsidiary Body on Scientific, Technical and Technological Advice:

# 12.c

In keeping with the provisions of Articles 16. 13 and 20. promote and cooperate in the use of scientific advances in biological diversity research in developing methods for conservation and sustainable use of biological resources:

# 113

The Contracting Parties shall:

# 13.8

Promote and encourage understanding of the importance of, and the measures required for, the conservation of biological diversity, as well as its propagation through media, and the inclusion of these topics in educational programmes;

# 13.b

Cooperate, as appropriate, with other States and international organizations in developing educational and public awareness programmes, with respect to conservation and sustainable use of biological diversity.

# 17 1

The Contracting Parties shall facilitate the exchange of information, from all publicly available sources, relevant to the conservation and sustainable use of biological diversity, taking into account the special needs of developing countries.

# 17.2

Such exchange of information shall include exchange of results of technical, scientific and socio-economic research, as well as information on training and surveying programmes, specialized knowledge, indigenous and traditional knowledge as such and in combination with the technologies referred to in Article 16, paragraph 1. It shall also, where feasible, include repatriation of information.

# 18.1

The Contracting Parties shall promote international technical and scientific cooperation in the field of conservation and sustainable use of biological diversity, where necessary, through the appropriate international and national institutions.

# 18.2

Each Contracting Party shall promote technical and scientific cooperation with other Contracting Parties, in particular developing countries, in implementing this Convention, inter alia, through the development and implementation of national policies. In promoting such cooperation, special attention should be given to the development and strengthening of national capabilities, by means of human resources development and institution building.

# 18.3

The Conference of the Parties, at its first meeting, shall determine how to establish a clearing-house mechanism to promote and facilitate technical and scientific cooperation.

# 18.4

The Contracting Parties shall, in accordance with national legislation and policies, encourage and develop methods of cooperation for the development and use of technologies, including indigenous and traditional technologies, in pursuance of the objectives of this Convention. For this purpose, the Contracting Parties shall also promote cooperation in the training of personnel and exchange of experts.

# 18.5

The Contracting Parties shall, subject to mutual agreement, promote the establishment of joint researcn programmes and joint ventures for the development of technologies relevant to the objectives of this Convention.
